EXPERIENCE

SENIOR TECHNICAL SPECIALIST; IT OUTSOURCE - GRAND CAYMAN, 2019 - CURRENT

Senior Specialist employed to manage new and existing client base including financial sector, leisure, re-insurance, broadcasting. Role incorporates; audit, asset management, on-boarding procedures, project management, security implementation and best practice management. Providing full service end to end client experience, implementing continual service improvement and incorporating ISO27001 standards. Additionally supply VMware, storage, server and virtualisation solutions, as well as cloud, enterprise mail, networking and security solutions for clients in the Cayman Islands and English speaking Caribbean.

SENIOR INFRASTRUCTURE CONSULTANT; CCS - BERMUDA, 2016 - 2018

Consultancy roles included; Acting Director of Supermarket IT, Corporate Backup Recovery Manager, Police Advisory Manager, Roll Out Manager for large global re-insurance firm, CCTV Integration Project Manager. Senior Consultant, ensuring clients are able to lower overall business operating costs and streamline process management. Creating IT solutions to maximise cost efficiencies and infrastructure flexibility with sole responsibility for affecting solution designs, proposal content (high and low level designs), project scopes, project plans, and overall architecture. Effecting the best use of virtualisation and security for each clients individual needs, taking into

account business growth, staffing, current and future IT assets. Essentially ensuring that IT infrastructure performs more efficiently and requires low maintenance for in-house teams.

TECHNICAL CONSULTANT; FORDWAY SOLUTIONS - LONDON, 2015 - 2016

Built on and acquired a broad understanding of IT infrastructure, exposed to a wide range of consultancy scenarios requiring dedicated solutions. Large project focus including; upgrading SANs, migrating exchange, setting up Commvault and rolling out Dell vWorkspace as virtualised desktop solution. Worked with both public and private sector clients, creating solutions to enhance the processes and results of their daily working practices.

IT SYSTEMS ENGINEER, INFRASTRUCTURE MANAGEMENT; FUJITSU - JOHANNESBURG, 2014 - 2015

Management of HyperV / VM Ware clients, upgrading working procedures, implementation and management of software including; HP SM7, SM9, Patrol, SCOM, BSA, and VMware. Working within the Fujitsu high priority technical team, developed strong adaptability skills and decision making strengths which was essential in quickly and effectively facilitating resolutions to complex technical situations.

SENIOR SERVER ENGINEER; WORLEY PARSONS - PRETORIA, 2011 - 2014

Responsible for supporting multiple server environments, large migration of legacy Kv3 offices over to 26 newly acquired WP sites. Travelled extensively in order to manage and oversee implementation thoroughly, working mainly with London office due to benefit of GMT. Predominant responsibility for server virtualisation roll out. Management roll out of Dell HyperV clusters in hosting centre. This was the biggest backup environment WP had implemented within the entire country to date and included backing up SQL and oracle databases.

SERVER ENGINEER; EOH - MIDRAND, 2007 - 2011

Three years onsite at Kv3 engineers, now known as Worley Parsons (WP) South Africa. Began with responsibility for the Pretoria office as the site administrator. Was quickly afforded greater responsibility and ultimately supported and managed the servers for all their branches, a total of 55 at that time. Also managed and supported; the Microsoft exchange environment, antivirus security, data security, offsite backups and Citrix support. In addition worked as a HP accredited integration specialist.
